JUNIOR WEB DEVELOPER

## ABOUT

I am a self-starter with a fascination for all things web-development. I am a self-taught, junior web developer looking to start my career and gain real-world experience as a full-stack developer.

I have had an interest in web development since the early 2000's. Currently, I am looking update and improve my knowledge base and skillset.

After a successful career of over a decade as an Electrician, I am looking to redirect my career path into web development.

## SKILLS

- HTML5
- CSS
- JavaScript
- React
- PHP
- MYSQL
- Figma

## WORK EXPERIENCE

### Freelance Web Developer

Over the years, I have created multiple personal web development projects a full website design for a local personal trainer.

Through these projects, I have developed a strong understanding of the basic skills required in web development. A more in-depth look at these projects can be found on my website.

Some of the more recent Projects include:

- **BookStack - A full-stack React app to organize your book library**  
BookStack is a custom Full-Stack web app that I programmed from the ground up as a portfolio project. It features a front-end UI made with React, and a backend API made with PHP and MYSQL. Book data is fetched from the Google Books API. This was not made using a tutorial.
- **Custom Wordpress Websites**  
Recently I was commissioned to create 2 websites. One for a local business and one for a local organization. These website included custom, responsive wordpress themes and involved working directly with clients to identify and achieve their goals. The two websites are:
  - [www.vitality-fitness.ca](http://www.vitality-fitness.ca)
  - [www.bikesandbrews.ca](http://www.bikesandbrews.ca)

### Pacific Western Power and Controls Ltd. Journeyman Electrician

2017-2022

My role was Lead Electrical Foreman of multiple projects including everything from small condo renovations to large-scale industrial food-production facilities.

With over a decade of experience as an Electrician, I was responsible for a wide variety of tasks including:

- Reading blueprints, diagrams, equipment documents, and schematics
- Troubleshooting electrical circuits and solving problems
- Managing and training teams of co-workers
- Having knowledge of all aspects of electrical systems such as residential, commercial, industrial, motor control, fire alarm, and data communication.
